

# CDL GENERATORS

## RAILROAD/INDUSTRIAL SOLUTIONS

It began in 1964, providing electrical services for residents and businesses around Pittsburg, Kansas. A few years later, we began maintaining and installing Highway Grade Crossing Signal Warning Systems and providing electrical services for companies in the short line railroad business. Since that time, CDL-Electric has expanded our customer base in the railroad industry by providing signal installation and maintenance, radio communications, signage, decals and yard security. CDL provides solutions for a variety of railroad companies and industrial facilities throughout the country. Let us provide a solution for you!

### ■ SIGNAL SOLUTIONS

Installation  
Maintenance  
Wiring Shelters  
Fabrication

### ■ RADIO COMMUNICATION SOLUTIONS

### ■ SIGNAGE SOLUTIONS

Decals  
Traffic Signs  
Crossing Signs

### ■ SECURITY SOLUTIONS

Alarms  
Cameras  
Remote Access/Control  
Generators

CDL represents the #1 selling Standby Generator by 'Generac' which provides automatic backup power to protect your business and crossings during a power outage. Connected to an LP or natural gas supply, it kicks in within seconds of determining a power loss and runs until utility power returns.

Another solid reason for choosing CDL for your generator service is first class installation with our qualified electricians. CDL is a trusted name in the rail industry having provided outstanding service since 1986.

### Why Generac?

- Superior engine to get you through hours or days without utility power
- Evolution Controller with multilingual, two-line LCD text display
- Fuel options for LP or natural gas and easily converts without tools
- Mobile link that allows a remote monitoring and control with your phone or computer
- Powder coat finish that handles all types of weather
- Quiet 'self-test' feature
- Superior installation from CDL professional electricians
