

# CDL HIGH VOLTAGE

RAILROAD/INDUSTRIAL SOLUTIONS

It began in 1964, providing electrical services for residents and businesses around Pittsburg, Kansas. A few years later, we began maintaining and installing Highway Grade Crossing Signal Warning Systems and providing electrical services for companies in the short line railroad business. Since that time, CDL-Electric has expanded our customer base in the railroad industry by providing signal installation and maintenance, radio communications, signage, decals and yard security. CDL provides solutions for a variety of railroad companies and industrial facilities throughout the country. Let us provide a solution for you!

#### SIGNAL SOLUTIONS

- Installation
- Maintenance
- Wiring Shelters
- Fabrication

#### RADIO COMMUNICATION SOLUTIONS

#### SIGNAGE SOLUTIONS

- Decals
- Traffic Signs
- Crossing Signs

#### SECURITY SOLUTIONS

- Alarms
- Cameras
- Remote Access/Control
- Generators

The CDL High Voltage Service helps prevent and solve electrical power problems through electrical engineering and testing, preventative maintenance, repair, replacement, and power system analysis on a routine or emergency basis. Our mission is to provide the highest quality electrical power solutions while maintaining a focus and responsiveness to your electrical power needs.

Our capabilities include transformer services, switchgear services, electrical equipment maintenance, electrical testing, repairs, replacement and circuit breaker remanufacturing.

To ensure safety and reliable results, our technicians follow a proven, step-by-step approach to electrical troubleshooting and preventative maintenance. Our NETA-Certified Electrical Test Technicians are some of the best-trained and most qualified professionals in the electrical power industry.
