

CDL RADIOS

RAILROAD/INDUSTRIAL SOLUTIONS

It began in 1964, providing electrical services for residents and businesses around Pittsburg, Kansas. A few years later, we began maintaining and installing Highway Grade Crossing Signal Warning Systems and providing electrical services for companies in the short line railroad business. Since that time, CDL-Electric has expanded our customer base in the railroad industry by providing signal installation and maintenance, radio communications, signage, decals and yard security. CDL provides solutions for a variety of railroad companies and industrial facilities throughout the country. Let us provide a solution for you!

CDL represents Motorola, the leader in radio communications for your work teams. Motorola technology means integrated voice and data and clearer voice communications.

You'll have digital quality throughout your coverage area with volume that automatically adjusts to compensate for background noise.

Why Motorola?

- Bluetooth® audio is embedded right in the radio
- Loud front speaker that automatically adjusts radio volume
- Superior units with long battery life
- Motorola digital technology works with your current analog units
- Superior training and maintenance from CDL professionals
